

## ***Before you book your appointment***

The fee for orthotics is \$500, which includes your assessment, gait scan and one pair of orthotics. A discount is available with the purchase of a second pair.

If you have insurance coverage:

- Check the amount of your coverage
- Check your insurance requirements. Some coverages require orthotic assessments be done by a Podiatrist, Chiropodist or Medical Doctor.
- Have a prescription for orthotics from your Family Doctor.

Know what type of shoes you will be wearing most often with your orthotics.

## ***At your appointment***

Your appointment will be approximately 30 minutes.

Know your shoe size and current weight.

Payment is due after your appointment, but DO NOT submit your insurance claim until after you receive your orthotics. Your orthotics will arrive within 2-3 weeks.

## ***After you receive your orthotics***

Submit your claim. Along with your orthotics you will receive additional information your insurance company will require to process your claim.
